

### **FROST DELAYS**

If there should be a long frost delay such that it is evident that normal AM and PM play will not be able to complete their rounds, then either the AM group or PM group will play a nine hole event. At the first occurrence the AM group will play nine (9) holes and the PM group will play 18 holes. At the next occurrence, the AM group will play 18 holes and the PM group will play 9 holes. Thereafter, 18 hole play will alternate between the AM group and PM group. To apply handicaps to a nine (9) hole event, use one-half of your handicap unless it is an odd number. The odd stroke is allowed on the front side. EXAMPLE: A handicap of 21 would be divided into 10 and 11. Use 11 if playing the front nine and 10 if playing the back nine.
